NEW LIFE IN THE SUN!

In September Animal Care rescued two old staffies who had been strays brought in to a dog pound in Leeds. They had completed their 7 days, no one had claimed them, and were due to be euthanized.

They are 12 year old and we decided to call them Chuck and Norris. We appealed for a new home for these two on Facebook and we ended up getting a great response.

A lovely couple from Portugal saw the appeal and decided to fly over to England to adopt the two boys. They are now living on a ranch in sunny Portugal, happy at last.

Good Luck !
Chuck & Norris

Max Appeal

Max and his brother Archie came to us from a very difficult and stressful situation last week. We can't begin to imagine the stress they have been through.

As soon as they arrived the staff fell in love with them both and their cheeky happy staffie characters.

It was very obvious to us that the large lump on Max's nose needed investigation to find out exactly what it was. After a biopsy at Bay Vets, they informed us our fears have become true and his results for a cancerous lump came back positive. At the moment the tumour is in a very difficult place and too large to remove.

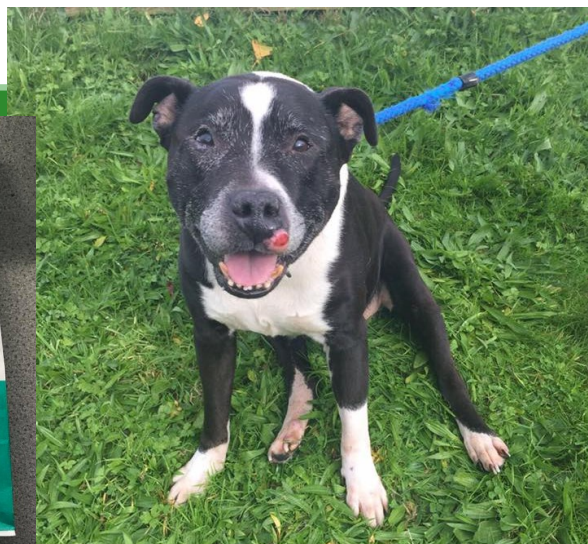

We are all devastated but determined to help this boy have a happy life for as long as possible. We have been given the option to place Max on a chemotherapy drug to hopefully shrink the mass with the possibility of removing it in the New Year.

The drug Max needs is very expensive and a 3 months prescription is estimated to cost over £1,200. The kind public have now managed to raise the money for Max's tablets. If you would like to help us help Max? Every penny raised will be to give Max the treatment, medication and after care he needs.

Max deserves the chance to fight this nasty disease and have the chance to find a new home with his brother who adores him.

Please help us with anything you can spare

Thank you

Christmas Cards and Calendars on sale soon!

CUTE CATS

We have some lovely cats in at the minute!

New boy scruff is super snuggly. He says the best place to rest is on the shoulders of a human, it did make the task of sweeping his pen a little more tricky than usual though!
